This is a nationwide concern and not just a local concern. Increased training requirements, family commitments, society changes have resulted in very low volunteer base and also made full time hiring a challenge.

Providing in home patient care to reduce Doctor Visits/ hospital visits and re admissions. RTF concept is being introduced and trained. Health care coalitions throughout the state are providing training and funding to provide training that focus on RTF. Changes in standard scope of practice for each level of EMS responders hope to make it easier to provide treatment, the focus it to relax the requirement of medical control to approve certain protocols this would make them already included.
